• CLASS II MD

Pure **natural** uniformly distributed **rubber latex** top-quality "**medical grade**" glove, **free of impurities**, free of stains and imperfections, anti-reflective colour. Anatomical, **right and left** indication printed on the glove, single body, without seals and smudges, with uniform thickness at the fingertips in order to guarantee tactile sensitivity and optimal dexterity. Fitted with cuff of sufficient length to allow adherence to the cuff of the gown and to prevent rolling.

Talc-free, with smooth internal coating treated to ensure ease of wearing and good adhesion (**T-Polyure coated**).

Glove with excellent elasticity and softness and with a high degree of resistance to tension. Thiuram-free. Sterilisation method: E-Beam ionising radiation.

The gloves can be used both as a **Medical Device** (for surgical and outpatient settings, and for dressing) and as individual **PPE** (for protection from chemical and biological risks).
